

To the members of the

Asociacion Espanola de Gastroenterologia

Dear colleagues,

It is my pleasure to invite you to join us at the European Colorectal Congress 2010. The main topics this year will be:

**COMPLICATIONS
LIVER METASTASES**

**European Colorectal Congress
1st to 3rd December 2010
St.Gallen, Switzerland**

Please see the scientific programme here.

Since no one likes to admit having complications after surgery, they are rarely discussed at a congress. Thus, we decided to focus this year's congress particularly on the topic of complications: What are the causes, how can we treat and how can we prevent them.

We are looking for the best free paper in the fields "Colorectal surgery" and "liver metastases". To encourage the participation of young professionals, we continue offering a reduced participation fee for fellows in training.

Furthermore we will offer two workshops on 30th November 2010 and during the congress. The workshops cover proctological topics and again NOTES & Single Port Surgery. The programme of the workshops includes live surgery (simulcast to the auditorium), discussion as well as hands-on training.

I'm looking forward to meeting you in St.Gallen at the European Colorectal Congress 2010!

Sincerely

Jochen Lange
Head of Department of Surgery
Kantonsspital St.Gallen, Switzerland
